

ROLLOVER RAKE FINGERS

The Rollover Rake Finger design by Lee C. Moore, A Woolslayer Company (LCM-WCI) provides a unique, safe and efficient racking operation.

Rollover Rake Fingers provide a flat walking surface for the derrickman, thus reducing trip hazards. This design efficiently retains individual stands of drill pipe without the use of chains or tie backs.

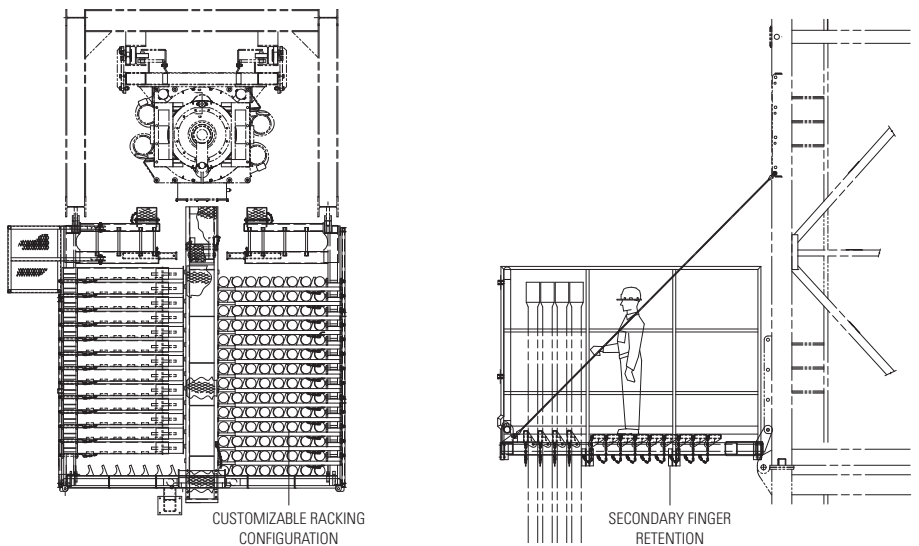

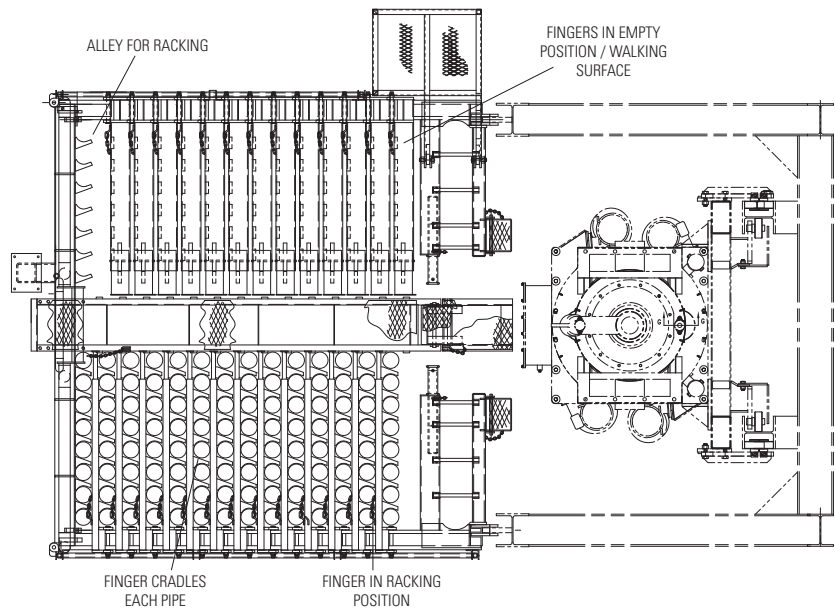

ROLLOVER RAKE FINGERS

Features and Benefits:

- Fingers rotate in position for racking operations and walk surface
- Provides a flat, non-skid, walking surface
- Currently designed for 5" or 5-1/2" O.D. drill pipe (customer specified)
- Pipe retention without the use of chains or tie backs
- Increased operational safety

Dimensions and Schematic:
